

# FORMING FLUIDS

## Forming Fluids

### Product Description

The MILFORM and CUMIFORM Series of stamping and tube bending fluids provide solutions to a wide variety of metal-forming applications. These superior lubricants include evaporative lubricants, straight oils, soluble oils and clean-operating synthetics. These products are developed to optimize tool life, part quality and cost efficiency. Evaporative products leaves almost nil residues on the Formed Products.

### Applications

For Ferrous as well Non Ferrous applications. HVAC Industries for Aluminum Fins Punching, Tube Bending, Electrical Laminations, Coins Punching, Blanking, Tube Forming, Drawing, Profile Stamping.

Applications	Product Type
Solvent Based (Evaporative Type) - For Light & Medium Duty Applicaitons	Milform 2108
Solvent Based (Evaporative Type) - For Light & Medium Duty Applicaitons	Milform 2220
Solvent Based (Evaporative Type) - For Light & Medium Duty Applicaitons	Milform 2315
Solvent Based (Evaporative Type) - For Light & Medium Duty Applicaitons	Milform 2408
Solvent Based (Evaporative Type) - For Light & Medium Duty Applicaitons	Cumiform 1006
Oil Based – For Light & Heavy Duty Copper Tube Bending	Milform 94
Water Soluble – For Heavy Duty Punching	Milform 645
